

To boldly go where no subwoofer has gone before (no apologies)

Push your Home Theater / Media Room “over-the-top”... *try this with your PS-3!*

#### Information

#### Earthquake's Quake 10.0 Is a Special Sub harmonic Bass Shaker

#### Unparalleled Tactile Performance in Your Home, Car, etc.

The Quake 10.0 is an awe-inspiring sub-harmonics unit designed for special-effects enhancement.

You can now add ultra-low-frequency effects without using costly hydraulics or a massive subwoofer.

You can control sound pressure levels throughout your home, car, or venue by effectively isolating the low end to your seats and flooring. The Quake 10.0 virtually eliminates low frequencies resonating into adjoining areas.

Designed for superior music quality, the Quake 10.0 answers the need for both accurate low-frequency response and maximum tactile effect. Music has never been more powerful and affecting.

#### Insane Power to Shake You to Your Senses

One Quake 10.0 bass shaker can easily replace three, four, or even five typical shakers. Quake 10.0 can move two or three theater seats or even a sizeable platform.

#### Quake 10.0s are maintenance free and almost indestructible.

With only one moving part, and a cast-aluminum heat-sink for excellent heat dissipation and protection from damage, the Quake 10.0 is the only shaker you'll ever need.

#### Special Features & Applications

##### Special Features:

- Universal Mounting Option
- 5-40 Hz Frequency Response
- Less Than 7-inches Long and Less Than 4-inches Tall
- 2-Ohm Military Grade, Flat Wire Aluminum Voice Coil
- Thermal Protection
- Cast Aluminum Heat Sink

##### Applications:

- Gaming Chairs
- Platforms
- Home Theaters
- Mobile Audio
- Flight Simulation
